

Ottawa, March 9 , 1944.

Sir:

I have the honour to inform you that
✓ in order to determine whether a greater use than
is now being made of the waters of the Columbia
River System would be feasible and advantageous,
the Governments of the United States and Canada
have agreed to refer the matter to the Inter-
national Joint Commission for investigation and
report pursuant to Article IX of the Convention
concerning Boundary Waters between the United
States and Canada, signed January 11th, 1909.

2. It is desired that the Commission shall
determine whether in its judgment further develop-
ment of the water resources of the river basin
would be practicable and in the public interest
from the points of view of the two Governments,
having in mind (A) domestic water supply and
sanitation, (B) navigation, (C) efficient development
of water power, (D) the control of floods, (E) the
needs of irrigation, (F) reclamation of wet lands,
(G) conservation of fish and wildlife, and (H) other
beneficial public purposes.

3. In the event that the Commission should
find that further works or projects would be feasible

The Secretary,
The International Joint Commission,
Ottawa.

and desirable for one or more of the purposes indicated above, it should indicate how the interests on either side of the boundary would be benefited or adversely affected thereby, and should estimate the costs of such works or projects, including indemnification for damage to public and private property and the costs of any remedial works that may be found to be necessary, and should indicate how the costs of any projects and the amounts of any resulting damage be apportioned between the two Governments.

4. The Commission should also investigate and report on existing dams, hydro-electric plants, navigation works, and other works or projects located within the Columbia River system in so far as such investigation and report may be germane to the subject under consideration.

5. In the conduct of its investigation and otherwise in the performance of its duties under this reference, the Commission may utilize the services of engineers and other specially qualified personnel of the technical agencies of Canada and the United States and will so far as possible make use of information and technical data heretofore acquired by such technical agencies or which may become available during the course of the investigation, thus avoiding duplication of effort and unnecessary expense.

I have the honour to be,
Sir,
Your obedient servant,

Secretary of State for
External Affairs
